PROFESSIONAL SUMMARY

With the exception of a couple of forays back into consulting and one brief engagement with an alternative financial media firm, Real Vision, I have spent the last few years focusing on Transition Insight—a project I began in 2010 after leaving IBM in the aftermath of the Great Financial Crisis.

Initially, it was a vehicle for independent integration work, building on my years at IBM as a client delivery executive. A secondary objective was to come to terms with crypto, explore digital signage and content, and dive into third-party attestation (such as e-signature solutions and SecureKey Concierge), as well as the Android digital wallet space.

With the evolution of Ethereum into a proof-of-stake protocol, I have shifted my full focus to the risks and opportunities posed by capital and its distribution across social networks, particularly within the context of artificial intelligence and the ongoing transformation of software development. My turf is governance and how it integrates identity and domain through capital.

PROFESSIONAL EXPERIENCE

Transition Insight

Writer, Thinker and Web3 Developer | *2022 – Present*

Independent work on governance, identity, domain and capital in the context of social networks and artificial intelligence, continuing the Transition Insight practice begun in 2010.

Thomson Reuters

Senior Agile Program Manager, ONESOURCE | *April 2019 – May 2022*

ONESOURCE is the primary utility used by transnational firms to manage corporate and value-added taxes to various sovereign authorities. Responsible for marshalling governance for development teams across Datahub, Core Platform, User Admin, Calendar and API Guild.

Ensured an Agile delivery and governance model dovetailed against long-term roadmaps, with stakeholder reporting, escalation and expectation-setting on delivery and execution. Maintained cohesion between Toronto-based core development teams and partnerships in Hyderabad, Minsk and Kyiv, primarily with Tech Mahindra and EPAM.

Transition Insight Consulting Inc.
